GAS LEAK DETECTION SYSTEM

GLD V2

Intelligent, wireless multi-gas leak detection for refineries.

3D illustration

LEARNS NEW GASES

New gas? Just train it.

The AI model is retrained on data captured at the refinery, so the range of detectable gases keeps growing.

Today **LPG** **H_2** + Next: as each refinery requires

Multi-gas

Many gases identified by a single device

Edge AI

Gas identified directly on the device

Self-healing

Wireless LoRa mesh that reroutes itself to the gateway

Instant alarms

Pushed straight to operators

GLD → **Cluster Head** → **Gateway** → **Dashboard**
